

Fly it, Drive it, Get it. Use it.

The World Leader of
Roadable Aircraft
"The Go Fast Anywhere, Anytime Vehicles."

LaBICHE
Aerospace

LaBiche Aerospace has developed the most advanced and practical general aviation aircraft in the world. The FSC-1, roadable aircraft, now gives you unprecedented freedom and utility never before imagined in a single vehicle. Finally, true "door-to-door" travel without the hassle.

Have you ever...

- Canceled a trip or become stranded due to weather?
- Quit flying due to expense?
- Put off a day with the airplane because it was too hot, or too cold?
- Decided to drive because it was a lot less hassle than flying, even though it was three times longer?
- Delayed a business meeting just to avoid the inconvenience of airport security and the car rental process?
- Skipped a day flying because you didn't want to brush the dust and spider webs off the airplane?

Now you can have "Hassle free" travel. In less time than it took you to read this pamphlet, you can push a button, convert from car to aircraft mode, and be on your way in the FSC-1 vehicle!

Attention. That's the word that best sums up the FSC-1. **Attention to Detail. Attention to Safety. Attention to Comfort. Attention to Performance. Attention to Practicality. Attention to Convenience.**

Over 15 years of engineering and development went into the FSC-1 vehicle, the flagship vehicle of the LaBiche roadable aircraft line-up. No other vehicle in history provides this level of convenience, comfort and flexibility. This relentless pursuit of practical, flexible, and attractive vehicles is causing nothing less than a revolution. *You just have to see one for yourself.*
